ASX code: **K2F**

Significant Milestone – K2fly’s Infoscope Land Management listed on SAP App Center

As mentioned in ASX announcement on 14 June 2018, K2fly Limited (ASX: **K2F**) (**K2fly**) has hit another significant milestone in its partnership with SAP by listing its flagship product, InfoScope Land Management System, on the SAP App Center. The SAP App Center is SAP’s online marketplace dedicated to all partner solutions and select SAP solutions built on SAP’s market-leading platforms.

K2fly’s successful entry into the SAP App Center is built upon the company securing a second accreditation in the SAP Partner program, from a Service partner to now being a Service and Build partner. This relationship commenced with K2fly’s participation in the SAP Co-Innovation program in November 2017. The porting of Infoscope to SAP’s S4 HANA Cloud environment was completed in March 2018 and K2F has been demonstrating the new cloud-based version of the software to a number of prospective clients in the last few weeks.

Brian Miller, CEO of K2fly commented, “This is a significant step for K2fly. We anticipate that there will be several dozen SAP sales professionals promoting our software within their customer base of 700+ mining companies. This is a most effective way of promoting our software to a very large ecosystem of clients and prospective clients. We are excited about the opportunities this could bring us, and we are already in a number of discussions with significant mining companies regarding the adoption of the Infoscope solution.”
