

# Community & Heritage

Local communities and their indigenous heritage are cornerstone conversations for your land operations. Infoscope provides you with a wide range of innovative tools to build effective community stakeholder engagement, provides sound rationale for any grievances and enables smooth ongoing participation in your project.

## COMMUNITY ENGAGEMENT

The local community is no longer considered a challenge to be overcome, but an opportunity to empower. Infoscope through its unique graph relationship engine helps map the complex confluence of relationships in communities, their hierarchical and cultural structures, and enables effective governance with the informed sensitivities.

## HERITAGE MANAGEMENT

Heritage management is an important statutory requirement that needs to be addressed in a responsible, consultative and fully compliant manner for projects to proceed in accordance with legislative time frames. Infoscope manages cultural heritage from the engagement of the right custodians to provide the necessary insights to establish heritage surveys, site recordings, engages in clearance approvals and completes any salvage or rehabilitation of artefacts.

## NATIVE TITLE AGREEMENTS

Negotiating Native Title agreements and managing their ongoing obligations is difficult, complete with challenges and shifting expectations. Infoscope creates a standards-based approach to delivering Native Title agreement summaries which produce clear expectations to all stakeholders. Through a

fully configurable workflow and reminder system, Infoscope will enable a high level of accountability and transparency in administering these agreements.

## COMMUNITY OBLIGATIONS AND REPORTING

Effective community engagement is when resource companies are seen to be doing more to create an inclusive environment for local stakeholders. Infoscope establishes smart frameworks for agreed outcomes for every obligation, and establishes the frequency of monitoring and reporting. These configurable workflows can be monitored and reported for progress and effectiveness.

## PART OF THE BIG PICTURE

Effective community engagement can make or break a project and is an ongoing situation full of challenges as well as opportunities to demonstrate positive social performance. As a heritage manager, Infoscope can be your one-stop shop to plan and keep track of your priorities and programs while also having the necessary information from the land access, landholder and tenement functions of the business.
