

RCUBED - THE FUTURE OF MINERAL RESOURCE & RESERVE GOVERNANCE, COMPLIANCE & REPORTING

All listed mining companies need to report their resources and reserves – essentially the primary asset of any mining company.

The way most companies do this today is inefficient and presents considerable governance risk.

A resource company can rapidly lose its reputation with regulators, investors and shareholders if it gets this report wrong. It also imposes an unreasonable impost and overhead on Competent or Qualified Persons (CP's and QP's).

RCubed is a secure, cloud-based platform which enables Mineral Resource & Reserve Governance, Compliance and Reporting. It dramatically reduces overhead on the reporting process for the key people (CP's and QP's in particular) involved and provides a systematised back-up and robustness that isn't available otherwise.

HOW IT WORKS

Responsible persons checklist & entity relationship tracking.

Capture of relevant information.

Data validation & audit, data checklists & roll-ups.

Sign Off & full control over the process.

Web Access, mobile device ready & easy insertion of data into annual reports.

FEATURES

- RCubed is a Robust application which has been developed with Industry leaders. It is Scalable, Flexible and Mobile enabled.
- RCubed de-risks complex and risky internal processes by systemising and simplifying them.
- Automated workflows enable the entire process from data capture to final sign-off ensuring an integrated and transparent reporting cycle.
- RCubed accommodates changes to the regulations that its customers report under, such as the JSE, ASX, LSX & NYSE
- RCubed can manage the requirements of multi-listed, multi-commodity, tier one mining company down to single commodity single listed companies.
- RCubed becomes the essential Single Version of Truth from beginning of the reporting cycle to its conclusion.
- RCubed provides full audit trails and all the information which auditors may require, thus reducing the overhead on the MRR team.
- Data in RCubed is rendered via integrated dashboards and reports with filters and access control allowing for the consumption of officially signed-off R&R data by executives and other stakeholders, removing the burden on the MRR team to respond to multiple requests for data.
- RCubed can become the single source of multiple and historical mineral planning and operational data.
- RCubed can be configured to meet the requirements of any of the international reporting standards and codes including CRIRSCO, CIM (NI 43101), JORC, PERC, SAMREC and US SEC Guide (and the new regulation S-K 1300).

RCubed Global Footprint

- 5** Major Stock Exchanges.
- 216** Sites.
- 41** Countries.
- 5** Continents.
- 37** Commodities.
- 2** Offices.

Information correct as of Aug 2019.
