

# K2fly Ground Disturbance

A Permitting & Approval Solution

Easily apply, approve, submit, track, report and submit ground disturbance permits and rehabilitation commitments.

## Cost Efficiencies

Your single source of truth reducing the likelihood of your company becoming liable of any breaches.

## Social License to Operate

Improve governance around statutory requirements, including management of applications, approvals and reporting of all ground disturbance permitting and commitments.

## Process Workflows

Our automated process workflows assist in the validation of spatial driven decision making.

Our solution provides a comprehensive approvals system, enabling you to keep track of your clearance limits, obligations and any breaches.

Governance can be achieved by automating workflows and tracking interactions between data, people, decisions and reporting.

## Solution Features

- ✓ Manage applications, approvals, reporting and closure of all ground disturbance commitments and activities
- ✓ Receive **real-time operational updates** to track your clearance limits, conditions, obligations and any breaches
- ✓ View **spatially intelligent workflows** which delivers a seamless mapping experience from application to permit approvals and closure of land use permits
- ✓ Create consistency of data management across all land operations using a single system for the application, approvals, reporting and closure
- ✓ Integrate with K2fly Heritage Management to display and **define areas of sensitivity** on the land you intend to disturb, ensuring you aren't liable for any unauthorised damages
