K2fly Heritage Management

A Stakeholder & Preservation Solution

Easily capture stakeholder and custodian engagement, approvals and conditions for heritage sites.

Build Community Relationships

Identify key stakeholders, Traditional Owners and surrounding communities to document their concerns, priorities and communications in one central location.

Increase Transparency

Capture, communicate and securely share culturally appropriate knowledge to increase transparency and break down internal and external siloes.

Stakeholder Management

Create strong governance for heritage approvals, exclusion zones and disturbance management by assigning relevant personnel and attach deadlines with in-built alerts.

Our solution provides a complete view of all stakeholder requirements to ensure you aren't disturbing culturally significant areas and manages the complexity and sensitivity of that data.

k2fly

K2fly Heritage Management provides a better understanding of community, culture and heritage to reduce risks and improve stakeholder trust and company reputation.

Solution Features

- **Access real-time data** from the associated departments to manage engagement

- **Manage land use agreements,** cultural heritage management plans and all associated obligations
