K2fly Resource Disclosure

An Inventory Data & Reporting Solution

Accurately adhere to all mine-to-mill public reporting requirements allowing you to remain compliant with codes and regulations.

Protect Reputation

Errors in reconciliation and resource & reserve reporting can result in severe implications. Let our system manage the entire process from data capture and validation to multi-level sign off.

Reliable Automation

Remove error prone in-house databases, spreadsheets and unnecessary email chains. With our solution, you can create and automate your own workflows, data capture and sign-off.

Gold Star Governance

Our solution adds assurance that the process is run properly with validation, governance to add greater visibility and reliability.

Our solution enables you to capture the raw resource & reserve data to easily disclose to multiple stock exchanges in the required format.
